

# Colin Keany

Software Designer based in New York City simplifying complex digital products for people like you, me and everyone we know.

## EXPERIENCE

### Product Designer

**MongoDB** - November 2016 to Present

Currently working with the design and development teams to build the best database solution on the market.

### Product Designer

**DigitalOcean** - June 2014 to November 2016

Responsible for defining new products and features from end-to-end including discovery & research, visual design, prototyping, front-end development and usability testing. Developed the internal styleguide for better scalability and efficiency during design and development phases.

### Lead Designer

**MediaTree Group** - March 2012 to June 2014

Directed, designed and built promotional websites for a variety of clients ranging from small business to fortune 500. Other responsibilities included all print and web-based design work, as well as front-end development.

### Design Coordinator

**vSplash Techlabs** - May 2011 to March 2012

Coordinated a four person design team that built small business websites and created web banner graphics.

## EDUCATION

### Visual Communications

**Kean University**

## SKILLS & PROFICIENCIES

Visual design, interaction design, research, wireframing, prototyping, user-flows, testing, HTML, CSS, JS.
